PROJECTS

1: PASSWORD GENERATOR (JAVA) :-

Built a console-based Password Generator that creates strong and secure passwords using user-defined criteria such as length and character types. This project strengthened my skills in programming logic, security concepts, and application development.

2: ATM INTERFACE SYSTEM (JAVA) :-

Built a console-based ATM Interface System implementing secure PIN verification, balance management, withdrawal and deposit operations, transaction history. This project strengthened my skills in control flow.
